ABOUT ME

As an experienced frontend developer, I bring a strong problem-solving mindset and a passion for creating intuitive, user-centric applications. With hands-on expertise in React/React Native and a solid foundation in customer service, I thrive in collaborative, innovative environments. I'm dedicated to delivering high-quality code and contributing to projects that make a positive societal impact. Adept at fostering teamwork and clear communication, I'm eager to leverage my skills to drive success in my next role.

PROJECTS

Astral Insights, LLC | 5 months

Technologies Used: React Native, REST API, Websockets, Typescript, Cybersource, Jira, Jest

Description: Application for client that allows users to upload lead information. The application integrates with two APIs to enrich lead data, displaying detailed profiles that include work history, social media links, interests, etc., organized into multiple categories for easy access and comprehensive insights.

Key Accomplishments:

- Led the frontend development, ensuring the seamless integration of client requests into functional features.
- Implemented a scalable architecture and delivered clean, maintainable code, enhancing the stability and performance of the application.
- Utilized Scrum methodology to maintain project momentum, actively participating in standups, sprint planning, and debugging sessions.

Celestial Cycle | 40 hours | [Repo Link](#) | [Deployed Link](#)

Technologies Used: Next.js, Typescript, React, Supabase, Cypress, REST API, Passage

Description: Responsive web application enabling users to track their menstrual cycle along with their horoscope and moon phase as a part of Women Who Code's Hackathon for Social Impact.

Key Accomplishments:

- Utilized continuous deployment practices using Vercel to ensure a seamless and bug-free product delivery.
- Implemented real-time data synchronization and user authentication with Supabase and Passage by 1Password.
- Facilitated daily team meetings to review progress, address any merge conflicts, and outline the next steps in the development process.

PROFESSIONAL EXPERIENCE

Astral Insights, LLC, Associate Frontend Developer, Raleigh, NC

Apr 2024 - Sep 2024

- **Served as the primary frontend developer for a startup**, leading code reviews and maintaining documentation, which fostered a culture of continuous improvement and supported team development.
- **Engaged in continuous learning**, staying current with frontend technologies to contribute effectively to ongoing and future projects.

H&R Block, Associate Team Lead, Garner, NC

Nov 2023 - April 2024

- **Led tax office operations**, combining Standard Operating Procedures (SOP) management, client service excellence, and escalated issue resolution, while ensuring service quality at the front desk.
- **Instrumental in hiring and team scheduling**, conducting interviews, and driving alignment with organizational goals and quality standards.
