CALLIHAN "CALLI" HERRMANN · Front-End Developer

Raleigh, NC • LinkedIn • Github

ABOUT ME

As a recent graduate of the Turing School of Software and Design, I am excited to apply my problem-solving skills and passion for front-end development. With a foundation in customer service, I'm eager to contribute to a collaborative, innovative team committed to positive societal impact. Adept at fostering teamwork and communication, I'm ready to make a meaningful difference in my next role.

- PostgreSQL
- Websockets
- Twilio Segment

PROJECTS

Celestial Cycle, Team project | 40 hours | Repo Link | Deployed Link
Technologies Used: Next.js, Typescript, React, Supabase, Cypress, REST API, Passage

Description: Responsive web application enabling users to track their menstrual cycle along with their horoscope and moon phase as a part of Women Who Code's Hackathon for Social Impact

Key Accomplishments:
- Utilized continuous deployment practices using Vercel to ensure a seamless and bug-free product delivery.
- Implemented real-time data synchronization and user authentication with Supabase and Passage by 1Password.
- Facilitated daily team meetings to review progress, address any merge conflicts, and outline the next steps in the development process.

Grateful Together, Team Project | 40 hours | Repo Link | Deployed Link

Technologies Used: React, React-Router, Cypress, REST API, Action Cable Websockets, Styled Components

Description: Responsive web application that dynamically updates to display users' journal entries in real-time

Key Accomplishments:
- Collaborated with a backend team through daily stand-ups to outline and align on the day's expectations and goals.
- Managed agile processes, working in iterations to organize workflow efficiently.

My Anime Ship, Solo project | 50 hours | Repo Link | Deployed Link
Technologies Used: React, React-Router, Cypress, Express.js, REST API

Description: Responsive web application that allows the user to calculate compatibility with chosen anime characters

Key Accomplishments:
- Independently developed a RESTful API to seamlessly bridge data communication between the front-end and the custom backend, ensuring a cohesive end-to-end integration.
- Prioritized thorough testing, resulting in a robust and reliable product for a niche audience.

PROFESSIONAL EXPERIENCE

Pennymac Loan Services, Loan Processor, Cary, NC   Sep 2021 - Oct 2022
- Assisted in the successful funding of 339 refinance loans, totaling an impressive $82 million, as of April 6th, 2022.
- Supported clients in collecting application documents and addressing inquiries during the application process.
- Facilitated communication between clients and Loan Officers to streamline the application process efficiently.

Adams County Food Bank, Volunteer Coordinator, Denver, CO   Dec 2020 - Apr 2021
- Oversaw volunteer staff, inventory, and equipment maintenance to ensure efficient warehouse operations.
- Maintained strict adherence to Food Safety & Sanitation guidelines, ensuring a safe warehouse environment.

EDUCATION

Turing School of Software and Design, Denver, CO   2023
- Accredited Front-End Software Engineering Certificate

Univeristy of NC at Greensboro, Greensboro, NC   2018
- Bachlor of Arts in Environmental Studies with minors in Photography and American Sign Language
